

MGTS IDAD Refined Growth Fund Factsheet – 01 March 2026

Investment Objective

The objective of the MGTS IDAD Refined Growth Sub-fund (the “Refined Growth Fund” or the “Fund”) is to provide capital growth over any five-year period. The Fund uses structured products to deliver reliable and consistent returns for portfolio managers allocating to alternatives.

Investment Manager Commentary

A very mixed month for global equity markets – S&P 500 down just under 1%, Eurostoxx 50 up just under 1%. FTSE 100 up 5% and, for balance, Hang Seng down 5%. The standout in February was the Nikkei 225 in Japan – up 8% on the month. What does this tell us about the state of the global economy? I've got very little idea at all, other than it's getting more and more difficult to forecast market movements. The fund had a pretty flat month, we still retain some exposure to China Hong Kong which remains volatile and the US market performance not great, with the exception of our participation note lined to the S&P 500 Equal Weight index. We have been increasing our UK exposure a bit, but we remain happy with our overall delta which we see as a slightly adjusted MSCI World weighting (US dialled down a bit).

The month saw maturities from primary and secondary market trades delivering average annual returns of around 12%. New trades focused more on capital protection as well as introducing a first trade with a new issuer – Scotia Bank. At the time of writing, the situation in the Middle East has deteriorated significantly. There is little to add to the commentary already available, but we anticipate significant market volatility ahead, perhaps for extended periods during the course of the year. The fund is well set to ride out the turbulence, and we expect continuing maturities in March and April with notes heavily 'in the money'. There should also be strong buying opportunities with increase market volatility and potentially higher swap rates. This year should be a good test of the fund's resilience.

Investment Strategy

The investment policy of the Refined Growth Fund is to provide capital growth over any five-year period. The Fund builds on the benefits of using structured product solutions to deliver more reliable and consistent returns for portfolio managers allocating assets to alternatives. By leveraging IDAD's extensive relationships with more than 30 investment-grade issuers, the Fund is able to enhance returns using diversified counterparty credit risk. Introducing traditional investment management skills and experience adds further value and contributes significantly to returns.

Core Holdings

The Fund has a core allocation to index-linked products providing broadly-diversified developed markets exposure. Products will be designed to deliver capital growth even if the underlying equity markets are flat or even fall slightly. These holdings represent around 80% of assets.

Tactical Holdings

A satellite allocation representing up to 20% of assets that are designed to produce higher returns by investing in products linked to a wider range of underlying instruments, such as less-developed equity market indices, sectoral indices, stocks and commodities. This part of the portfolio may become very defensive during periods when the managers are concerned regarding market direction.

Liquidity & exposure management

The Fund may also invest in ETFs to manage liquidity and geographic exposures.
